Problem Statement

01

Real estate app
for buying and
selling
properties.

02

Keeping track
of the sales of
properties.

Our Solution will Benefit to :

**Easy to sell
House**

**Find suitable
house.**

**Contact Agents for
More details**

Our Product or Service

Technology Used

Vercel

MongoDB Atlas

Ec2 Node Js

Google Authentication

React Js - Frontend

Architecture

Vercel

- It allows developers to host websites and web services that deploy instantly, and require no supervision and configuration.
- PaaS
- A few of the main advantages of Vercel are fast refresh, flexible data fetching, and easy integration with Github.

Google Authentication

- Google Authenticator is a software-based authenticator. It implements two-step verification services using the Time-based One-time Password Algorithm and HMAC-based One-time Password algorithm, for authenticating users of software applications.

MongoDB Atlas

- DBaaS
- MongoDB Atlas is a fully-managed cloud database that handles all the complexity of deploying, managing, and healing your deployments on the cloud.

EC 2

- IaaS
- Amazon Elastic Compute Cloud is a web service that provides secure, resizable compute capacity in the cloud. It is designed to make web-scale cloud computing easier for developers
